

ChanceLight Behavioral Health offers high-quality, research-based solutions for children and young adults with a wide range of diagnoses, including autism spectrum and other behavioral disorders.

ChanceLight is a leading provider of Applied Behavior Analysis (ABA), which is widely recognized as an effective, evidence-based treatment for autism and is endorsed by the U.S. Surgeon General and American Academy of Pediatrics as the treatment of choice for autism. We provide comprehensive services to children, young adults and their families in their homes, in clinics and in schools and on or near military bases throughout the country. ABA therapy is covered by many private and government insurance providers, including TRICARE.

**ABOUT APPLIED BEHAVIOR ANALYSIS**

According to Autism Speaks, Applied Behavior Analysis fosters basic skills such as looking, listening and imitating, and complex skills such as reading, conversing and understanding another person’s perspective. ABA also helps reduce behaviors that make it difficult for students to learn. Studies indicate that the earlier children receive ABA therapy, the more gains they make.

ChanceLight offers comprehensive services through:

**EARLY AUTISM PROJECT**

ABA therapy for children and young adults with autism spectrum and related disorders

**EDUCATION ALTERNATIVES**

Educational and behavioral supports for school districts

**GROWING MINDS**

Community living supports, respite services, behavior supports and ABA therapy for children with developmental & behavioral disabilities

**CLIK**

Behavior supports, ABA therapy, outpatient mental health services, social skills groups, & physical, speech & occupational therapies for children & adults
